

SERVICES

Barbara Livingston

C. Lynwood O’Cain, DVM, our General Manager and Resident Veterinarian, specializes in equine reproduction and neonatal care. Under his supervision, **HIGHCLIFF FARM** has established an

integrated management program encompassing all aspects of horse care and maintenance, and allowing for individual attention to horses with special needs.

The quality of **HIGHCLIFF FARM**’s environment, staff and facilities are just as important as bloodlines in producing superior runners. Rolling hillsides, high limestone content and other elements of the environment help equine athletes build strong muscles and bones. These natural advantages, combined with **HIGHCLIFF FARM**’s knowledgeable staff, and meticulous attention to detail, make for an atmosphere ideally suited for raising tomorrow’s racehorses.

Barbara Livingston

Since our breeding and foaling program began in 1989, it has been very well received by mare owners, both locally and out-of-state. In addition to foaling services, seasonal and year-round

boarding are available. **HIGHCLIFF FARM** is the **ONLY** facility in NY that has a 24-hour staff to offer round-the-clock supervision. In addition, we have a foaling duo that has over 40 years combined experience.

We feel we have the strongest sire roster in New York State and have been overwhelmingly supported, not only by NY Breeders, but breeders throughout the country. We have been recognized as being New York’s #1 stud farm and #10 in US, by percentage of graded stakes winners from 100 or more starters. **HIGHCLIFF FARM** is continually represented by superior racehorses that have been bred, foaled and raised at our facility. Owners interested in foaling or breeding at **HIGHCLIFF** are encouraged to call and book their mares early, as space fills quickly during the breeding season.

- **Resident Veterinarian/Farm Manager**

- *Eliminating costly service call fees*
- *Immediate response time for foalings and/or emergencies*
