

TRANSIT BREEDING
2012 FARM REQUIREMENTS

Dear Breeder,

The following is a list of requirements for all mares being transit bred at HIGHCLIFF FARM for the 2012 breeding season:

- 1.) CURRENT NEGATIVE COGGINS TEST TAKEN WITHIN THE PAST TWELVE (12) MONTHS.
- 2.) A NEGATIVE UTERINE CULTURE FOR EACH BREEDING CYCLE IS REQUIRED BEFORE A STALLION WILL COVER A MARE.

We are not requiring an EVA test for the 2012 breeding season.

Thank you for your interest in our stallions and for breeding with us. If you have any questions, please do not hesitate to contact the farm at any time.

Thank you,

C. Lynwood O' Cain, D.V.M.
